

Abdalmegeed Alfiky

SOC Analyst | Cybersecurity | Network & System Administration

abdalmegedalfiky@gmail.com | +20 1080219946 | linkedin.com/in/abdalmeged-al-fiky

▣ PROFILE SUMMARY

Cybersecurity-focused professional with a strong foundation in networking and system administration, currently advancing as an Information Security Analyst through the Digital Egypt Pioneers Initiative (DEPI). Hands-on experience in Security Operations Center (SOC) activities including SIEM monitoring, log analysis, phishing detection, and incident response using Microsoft Defender. Proven ability to detect threats, investigate anomalies, and support secure enterprise environments. Combines real-world IT operations experience with a security-first mindset to identify and mitigate cyber risks effectively.

▣ EDUCATION

Bachelor's Degree in Computer Science — Faculty of Computers and Information, Tanta University	09/2019 – 06/2023
Cybersecurity Training — Information Security Analyst Track — Digital Egypt Pioneers Initiative (DEPI)	11/2025 – Present
• Built strong foundation in data protection, encryption, and enterprise security architecture • Gained hands-on experience in SOC operations, SIEM monitoring, and log analysis • Performed threat analysis using IoCs and Attack Kill Chain methodology • Conducted vulnerability assessments and risk prioritization • Implemented incident detection using SIEM and anomaly analysis techniques • Applied full Incident Response lifecycle (Detection → Containment → Eradication → Recovery) • Developed professional technical reporting and incident documentation skills • Completed a SOC simulation project covering monitoring, investigation, response, and decision-making	
CCNA Acceleration Scholarship — National Telecommunication Institute (NTI)	02/2023 – 02/2023
Network Fundamentals, Switching, IP Connectivity, Security, Automation	

▣ PROFESSIONAL EXPERIENCE

Dash, Product Owner (Remote)	06/2026 – Present
• Define and prioritize the product backlog aligned with business goals and user needs • Collaborate with stakeholders to gather, refine, and translate requirements into actionable user stories • Work closely with the development team to deliver product increments on schedule • Communicate product vision, goals, and progress to senior leadership • Conduct market research to inform and evolve the product roadmap	
Egyptian Army, Signal Corps Officer	10/2023 – 10/2025
• Monitored and maintained secure network operations, ensuring system availability and integrity • Investigated and resolved network and system issues including connectivity anomalies and access-related incidents • Managed user accounts and access control (IAM), aligning with security policies and compliance requirements • Supported incident handling processes by identifying abnormal system behaviors and assisting in resolution • Performed network diagnostics and troubleshooting to maintain operational continuity and minimize downtime	

▣ TECHNICAL SKILLS

Security Operations (SOC): | SIEM Monitoring & Log Analysis | Incident Detection & Response (IR Lifecycle) | Phishing Analysis & Threat Identification | Microsoft Defender (Incident Investigation & Mitigation) | Threat Intelligence & IoCs | Attack Kill Chain Analysis | Security Event Correlation & Alert Tuning

Security Tools & Platforms: | Microsoft Defender for Endpoint | SIEM (Training + Simulation Projects) | TryHackMe (SOC Analyst Path) | Log Analysis using Python | Network Analysis Tools

Networking: | TCP/IP, Routing & Switching (CCNA Level) | DNS, DHCP, Network Troubleshooting | Network Traffic Analysis | Structured Cabling

System Administration: | Windows Server & Active Directory | Identity & Access Management (IAM) | OS Hardening & Patch Management | Linux Administration (Red Hat)

Programming & Automation: | Python, Bash, SQL, C++ | Ansible Automation

▣ PROJECTS

ELK Stack SIEM Implementation
• Deployed and configured ELK Stack (Elasticsearch, Logstash, Kibana) for centralized log monitoring • Ingested and parsed logs from multiple sources (servers, endpoints, network devices) • Built dashboards and visualizations in Kibana for real-time security monitoring • Created detection rules to identify suspicious behaviors and anomalies

- Performed log correlation and event analysis to support incident investigation

Vulnerability Assessment & Management Project

- Conducted vulnerability scanning on systems and network services using security assessment tools
- Identified critical vulnerabilities (misconfigurations, outdated services, weak authentication)
- Classified vulnerabilities based on severity (CVSS-like approach)
- Prioritized remediation actions based on risk and business impact
- Provided detailed remediation recommendations and security hardening guidelines
- Simulated real-world vulnerability management lifecycle (Scan → Analyze → Prioritize → Remediate)

SIEM-Based Log Analysis & Alerting System

- Designed and implemented a simulated SIEM system for centralized log collection
- Correlated logs from multiple sources to detect suspicious activities
- Built alerting rules for brute-force attacks and unauthorized access attempts
- Simulated real-world SOC monitoring and escalation workflow

❑ CERTIFICATIONS

ISC2 Certified in Cybersecurity (2024)	Cisco Certified Network Associate (CCNA) – NTI (2023)	IBM Cybersecurity Fundamentals	Microsoft Learn	Google IT Support
			• Mitigate Incidents using Microsoft Defender	• Fundamentals – Coursera
			• Plan and Implement Security for Virtual Networks	

❑ LANGUAGES

Arabic: Native | English: B2 (Good Working Proficiency)
